

21 MARCH 2019

AUTISM MELTDOWN WEBINAR

Are you tired of hearing useless techniques and advice on how to deal with your autistic child's meltdown? Do other's give you advice and strategies that seem to inflame situations and escalate them?

Nelle Frances felt the advice given to her by various Professionals made Autism Meltdowns worse and fostered a more **volatile** relationship with her child.

Nelle believed that if her autistic child **could** change his behaviour he would. She knew that he was rule oriented, he liked to please adults and that he was doing the best he could. So she began to look for patterns of behaviour during his meltdowns, and that's when her family *turned the corner* and began to deal with his outbursts in an alternate and more successful way!

Nelle's Meltdown Webinar includes strategies and techniques THAT WORK from her lived experience, from her own family's journey with Autism.

If you want to understand your **child's brain processes** during meltdown register today to fast track your learning and expertise, so you can get back to loving your family relationships!
