

Sensory Detective Workshop

AUTISM TRAINING

DECODING AUTISM/ASPERGER'S BEHAVIOUR THROUGH SENSORY AWARENESS by Nelle Frances

The Outcomes from this FREE Roma/Injune Workshop include being able to:

- Better understand Autism/Asperger's
- Know the characteristics of ASD
- Understand physiology of meltdowns
- Recognise sensory agitation
- Understand the connection between sensory issues + behaviour
- Establish accommodations for the ASD child

This high-impact training session includes a complete description of AS characteristics - using anecdotal examples to "make the pieces fit" the picture of the child in your care. Nelle offers insight into the processing differences and changing perspectives of individuals with Autism and Asperger's, and provides examples of resources and tools for use at home and in the classroom.

The training includes Nelle's high-impact Sensory Detective © workshop - an interactive simulation that allows you to look at Autism/Asperger's from the inside out! You will learn first hand that sensory stimuli influences all behaviour, emotional development and academic progress of those with Autism/Asperger's.

Participants learn specific techniques for dealing with challenging behaviours and decreasing stress in individuals with Autism/Asperger's. These techniques allow you to guide and support ASD individuals towards self regulation.

When: Tuesday 23rd April / Wednesday 24th April 2019

Time: 9:00- 3:00 p.m
